

GE Digital GRID 2022 Intern Program

Title: GE Digital Internship Opportunities

Description:

Do you want to utilize your technical education and skills to be a part of transforming how the electrical industry solves its toughest challenges? Our years of hard-won insights in power generation, electric utilities, oil & gas, and manufacturing mean we're uniquely positioned to help our customers better operate, optimize, and analyze their work.

The global Energy transition is one of the most tectonic shifts we will experience in our lifetimes. GE has every intention to play a lead role in driving the world forward toward a decarbonized future and a more sustainable planet. Innovation will be required to deal with the emerging market shifts... enabling more renewable energy on the grid, decentralized assets, reducing emissions, changing weather patterns to name just a few. We know that Digital capabilities in and around the Grid will be essential in enabling decarbonization, so we have a direct and meaningful role to play.

As part of GE, we have a unique opportunity to change the way industry works. Driven by people, process and proven technology, our teams collaborate closely with our customers to make complex things simple: turning vast amounts of data into tangible, lasting results - at unparalleled speed and scale.

We are looking for talent with a passion for shaping Energy transformation to join us on our internship program. You'll have an opportunity to work as part of a team that includes many talented professionals with deep domain expertise and more than 1000 engineers, over 300 of which have PhD's. We have several unique and exciting opportunities for you to apply your knowledge and contribute in significant ways to transforming how we analyze, optimize, and control the grid.

GE Digital. Putting Industrial Data to Work.

Featured Opportunities:

- Go to GE Careers site - [HERE](#)
- Click on **Search Jobs**
- **Refine Search** by filtering **Country** (United States of America), **Business** (GE Digital), and **Experience** (Co-Op/Intern)

United States Of America X GE Digital X Co-Op/Intern X [Clear All](#)

- Most of our opportunities are located either in Bothell, WA or Melbourne, FL however we are open to remote employees across the United States

Did you know?

1. 8/10 of the top gas and electric utilities in the Fortune 500 are GE Digital customers.
2. 1/3 of the planet's electricity is generated by GE
3. 90% of the world's power utilities are equipped by GE
4. 40% of the world's energy is managed by GE Digital Industrial Software.
5. 50% - the percentage global demand for power is expected to grow by 2040.
6. GE has 1.2M Digital Twins deployed, with 9200 energy assets managed
7. GE is developing applications with PG&E to help manage and restore the grid during wildfire events
