

## **Electrical Engineering Intern**

Rushing is a Seattle based MEP (mechanical, electrical, and plumbing) engineering and sustainability consulting firm. Our firm is founded on the principles that a multi-disciplinary approach is critical in evaluating building performance from a whole-building perspective. This position supports the Electrical Team.

**Our Core Values guide our everyday business. If these items resonate with you, please consider joining us on this journey:**

- (1) Professional Ethics
- (2) Informed, Expert Consulting
- (3) Courageous Transparency
- (4) Respectful Team Building & Community
- (5) Curious Problem Solving
- (6) Open Minded Learning
- (7) Focused Actions
- (8) Patient Resolve

This individual will be part of an integrated team performing electrical design and supporting junior electrical engineers with elements of design, engineering, inter-disciplinary coordination, and code research. We are looking for a team member who can function independently, collaborate on a team level, manage multiple assignments, and contribute to the growth of Rushing.

### **PRIMARY RESPONSIBILITIES:**

Assisting our team in electrical design efforts for projects including:

- Code review and confirmation.
- Internal design coordination.
- Utility standards research and coordination for power utility providers.
- Load Calculations.
- Fault Calculations.

### **QUALIFICATIONS:**

- Currently working toward a BSEE degree.
- Team player with a can-do attitude.
- Strong written and verbal communication skills are essential.
- Excellent organizational skills.
- Skilled in task management, and problem solving.

Position is part time, temporary, non-exempt (hourly.) Rushing is an equal opportunity employer, demonstrating a deep commitment to diversity and inclusion as evidenced by women leadership in nearly 50% of management roles and a high level of cultural diversity amongst staff.

Candidates must be eligible to work in the U.S.

No phone calls please. No recruiters or agents please.
