

W. L. Gore & Associates

2023 IT Developer & Security Summer Internships

We are looking for talented, hands-on individuals who have demonstrated the initiative to apply computer/technology fundamentals and successfully navigate ambiguity to solve problems and deliver results.

Typical Opportunities include:

- **Application Development/Configuration**
Focuses is on designing, configuring and delivering software. Within this space you can find yourself working on technical requirements elicitation, software design, development, infrastructure automation, cloud-native systems, software support and troubleshooting. Other specialized roles could include augmented reality exploration, IoT and artificial intelligence and how those technologies can be used at Gore.
- **Information/Cyber Security**
The Information/Cyber Security area of focus includes vulnerability management, network security, identity and access governance, and incident response. Potential roles could include Security Analyst, Security Administrator and Incident Response Analyst.

At Gore, we believe in you as an individual. We value your know-how and ideas. Our goal is to create a positive, respectful workplace in which everyone is treated fairly. If you are searching for a company where you can learn, contribute, and make a difference, we're looking for you!

Together, improving life
