

## CAREER OPPORTUNITY

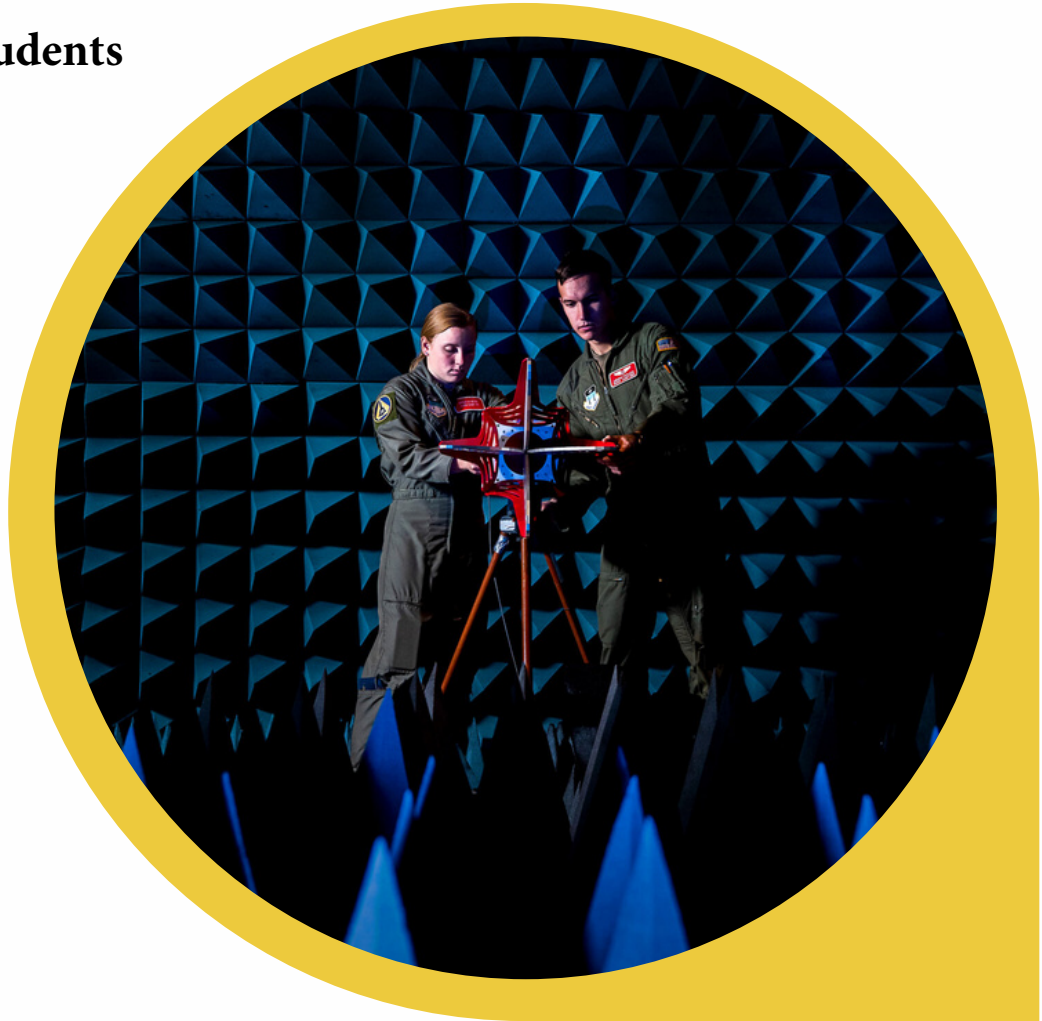

# ELECTRICAL ENGINEERS

## Undergrad and Grad Students

The Air Force and Space Force's increasing reliance on electronic surveillance, electronic warfare, cyber warfare, advanced communication systems, and modern computers has created an insatiable demand for Electrical Engineers (EEs).

As an Electrical Engineer, you will combine your creativity and analytic ingenuity to optimize existing electronic systems, as well as design new systems that have not yet even been conceived.

The opportunity is a premier experience to those looking for a stable first step into the electrical engineering field post college.
