

Leadership in STEM

BIOEN 599, Winter 2024

Wednesdays 9:30 to 11:20 am, MUS 219

Instructors: **Azadeh Yazdan**, PhD (Associate Professor, Bioengineering, Electrical and Computer Engineering), **Kathy Leach**, PhD (Biotechnology Industry Consultant)

The goal of this course is to introduce students to leadership skills to propel them forward in their careers and lives, whether that is in academics or industry.

The course will be a mix of lecture and group discussions, supplemented with small group exercises where students can practice the skills introduced in the lecture.

The course will provide:

- knowledge of contemporary topics in leadership
- an introduction to the wealth of leadership resources available
- practical skills and tools to use as leaders

For further information and course description, contact Azadeh Yazdan (azadehy@uw.edu) or Kathy Leach (kjleach@uw.edu).
