CAREER TREK

Are you an ECE student interested in innovative power systems? Think outside the box and join us for a tour of the King County Wastewater Treatment Division's new battery system! This 16.8-megawatt system powers critical pumps, preventing voltage sags and ensuring stable operations. Learn how the system is integrated with over 48,000 battery cells and how solar panels provide clean energy for the facility's operations. It's a unique opportunity to see cutting-edge technology in action and gain insights into real-world applications of energy storage and sustainability!
